Tomas Maly

Senior Mobile and Full Stack Engineer
Asheville, NC (Eastern) | tmaly1980@gmail.com | tmaly1980.github.io

Senior mobile and full stack engineer with **8+ years of React Native**, **3+ years of Swift/SwiftUI**, and experience leading international engineering teams, backed by **20+ years of web/backend development**. Primary industry experience: *field services, logistics, rideshare, fitness/well-being, coaching, fintech, and e-commerce*.

CORE EXPERTISE

FRONTEND: React Native, Swift, SwiftUI, Expo, TypeScript, React, Next.js, Vue.js

BACKEND: Node.js, Nest.js, REST APIs, PHP/Laravel, Rails

DATABASES: Supabase/PostgreSQL, SQL Server, MySQL, SQLite, Firebase, TypeORM, Auth/RLS

ARCHITECTURE: Offline-first, multi-tenant, modular application design, MVVM, MVC

INTEGRATIONS: Realtime/WebSockets, Stripe, RevenueCat, Push Notifications, Google Maps, barcode scanning, AI-based image analysis, internationalization (i18n), localization (l10n)

PLATFORMS: AWS (S3/SNS/Cognito/Lambda), Google Cloud, Firebase, Vercel, Azure DevOps

DELIVERY: CI/CD, App Store/Google Play releases, GitHub Actions, CircleCI, Fastlane

QUALITY: Unit and Integration Tests, production diagnostics, Sentry, Crashlytics, Bugsnag, ESLint

TEAM & PROCESS: International team leadership, code reviews, documentation, pair programming, Agile practices

Sept 2025-Present: Freelance, Senior Mobile / Full-Stack Developer

Worked with early-stage startups, entrepreneurs, and established field-service businesses, delivering end-to-end mobile and full-stack development from architecture through deployment and production support.

Frontend: React Native · React · TypeScript · Next.js · HTML5/CSS3 · Stripe · RevenueCat · Realtime/WebSockets
Backend: Node.js · Nest.js · Supabase/PostgreSQL · OpenStreetMap · Valhalla

MyIndiePro - Multi-Tenant Field-Service SaaS (Web)
- **Product mindset:** Architected a multi-tenant field-service SaaS with reusable workflows across multiple trades.
- **Architecture & scalability:** Designed tenant isolation, authorization boundaries, and distinct frontend + backend.
- **Troubleshooting:** Implemented tenant-aware structured logging to trace beta issues by provider and workflow.

APS Environmental Services - Field Operations / Environmental Services (iOS & Android)
- **Business-critical software:** Built a field-service platform for environmental testing requests, photo/document uploads, scheduling, notifications, and reports.
- **Reliability & resilience:** Architected secure realtime workflows for mobile-first field use.
- **End-to-end ownership:** Owned architecture, implementation, deployment, and production support.

Meti Taxi - Rideshare Platform / Eastern European Markets (iOS & Android)
- **Complex technical challenges:** Architected wave-based driver matching using distance, performance, completion time, and availability.
- **Cost / performance engineering:** Built self-hosted Valhalla routing/ETA with caching and geospatial optimization.
- **Realtime systems:** Built driver-liveness, heat maps, routing, and realtime state synchronization.
- **Internationalization / localization:** Added Georgian language and locale support for the target market.

LockAtlas + LockAtlas Technician - On-Demand Locksmith Marketplace / Field Operations (iOS & Android)
- **Product ownership:** Migrated vibe coded prototype to production database and release, redesigning workflows, geographic matching, payments, and estimating.
- **Architecture:** Implemented realtime updates with technician location, job status, work authorization, and updates.
- **Payments:** Implemented Stripe billing and technician payouts.

FitRoutine - Fitness Coaching / Wellness Management (iOS & Android)
- **Product architecture:** Designed personalized weekly routines across workouts, meals, habits, and meditation.
- **Subscriptions:** Integrated RevenueCat for mobile subscription management.
- **Operational tooling:** Built a web admin portal for managing content available to users.

2018-2025: Xplor Technologies, Senior/Lead Mobile Developer

Spent seven years across multiple mobile product teams, leading migrations, major releases, production stabilization, and collaboration with international engineering teams.

Frontend: React Native · Swift · SwiftUI · UIKit · Expo · MVVM · Jest · XCTest/XCUITest · Crashlytics · Bugsnag
Backend: REST APIs · SQLite · SQL Server · Firebase · AWS (S3/SNS/Cognito) · Fastlane · CI/CD

Spot Delivery Connect Mobile - Dry Cleaning Pickup / Delivery (iOS & Android)
- **Business-critical software:** Led 4 developers migrating a pickup/delivery platform used by drivers for hundreds of dry cleaning businesses from Xamarin to React Native.
- **Reliability & resilience:** Designed offline-first operation for unreliable connectivity; barcode verification requirements.
- **Legacy modernization:** Reverse engineered legacy Xamarin functionality, used Jest tests to validate migrated behavior, improved modularity using linting rules, and ensured quality through code reviews and QA processes.

TrueCoach - Fitness Coaching (Native iOS)
- **Technical leadership & scale:** Led 4 developers through multiple major releases on a platform serving 16,000+ coaches and 250,000+ clients, with 50M+ workouts. Worked with product and design teams to ensure functionality met release deadlines.
- **Product engineering:** Implemented wearable-data integration and coach-client chat across Swift/SwiftUI/UIKit.
- **Software craftsmanship:** Built XCTest/XCUITest unit/integration coverage and used Bugsnag for production diagnostics.

MarianaTek - Fitness Studio SaaS (Native iOS)
- **Software craftsmanship:** Worked in a mature Swift/SwiftUI/UIKit environment emphasizing pair programming, XCTest/XCUITest coverage, maintainable architecture (MVVM), and pixel-precise UI.
- **Shared architecture:** Developed shared SDKs used across multiple internal mobile apps.
- **Multi-tenant product development:** Contributed to a fitness studio booking, billing, and scheduling platform serving ~400 clients.

ZingFit - White-Label Fitness Studio Platform (iOS & Android)
- **CI/CD at scale:** Architected release automation for hundreds of independently branded iOS and Android applications and created a multi-tenant CI/CD management portal using Vue.js.
- **White-label platform:** Supported a multi-tenant mobile product serving ~200 client organizations with independently branded applications.
- **Operational excellence:** Built deployment visibility and owned releases across client-specific environments.
- **Maintenance:** Managed Push Notification infrastructure across AWS SNS and APNs/FCM, periodically troubleshooting notification issues.

2002-2017: Various Employers, Web Developer

Full-stack web development across fintech, e-commerce, agritech, regional business platforms, and custom internal software, spanning database design, payments, data import/export, deployment, optimization, and production support.

Frontend: JavaScript · jQuery · Vue.js · HTML5/CSS3
Backend: PHP · Laravel · Ruby on Rails · MySQL · SQL Server · Microsoft Azure · Linux · Stripe · Authorize.net

MyTown USA - Regional Business / Events Platform
- **Regional platform:** Developed a local events and coupons platform for regional businesses, including business listings and city-specific content.
- **Scalability & content:** Designed the platform to support expansion across multiple cities with reusable content and business-management workflows.

Central Valley Software / Grower Analytics - Agritech Analytics Platform
- **Agritech analytics:** Developed crop-yield, historical-trend, and comparison tools while optimizing SQL Server data access in Microsoft Azure.
- **Data engineering & modernization:** Built XML, Excel/CSV, and JSON import/export workflows, responsive filtering and visualization, and led migration to PHP/Laravel.

Harmony Designs - E-Commerce / Personalized Products
- **E-commerce product:** Built a personalized-gifts ordering system with live design-as-you-go previews (using SVG), Authorize.net payments, and dynamic image generation.
- **Conversion & operations:** Developed cross-browser ordering interfaces and worked on SEO, A/B testing, conversion optimization, shipping workflows, and web analytics.

Innovex Mortgage - Fintech / Mortgage Software
- **Fintech workflows:** Developed debt-analysis software used by loan agents to model debt consolidation and cash-out refinancing, including financial calculations and user-facing workflows.
- **Team & production support:** Worked within a team of 4 developers and supported the PHP/MySQL application in a Linux environment.

EDUCATION

1998 - 2002: San Jose State University - Bachelor of Science, Computer Science
